

StockPlus™ is Door Components' Extraordinary Stock Door Program

Door Components offers the fastest and most customizable stock doors on the market. With our StockPlus™ program our dealers can purchase a honeycomb or polystyrene door, choose their hinge and lock locations and other features, and pick their door up by the end of the work day.

All Manufacturers' Locations –
Don't be tied to a single vendor. Your StockPlus order will be built to any manufacturer's hinge and lock locations.

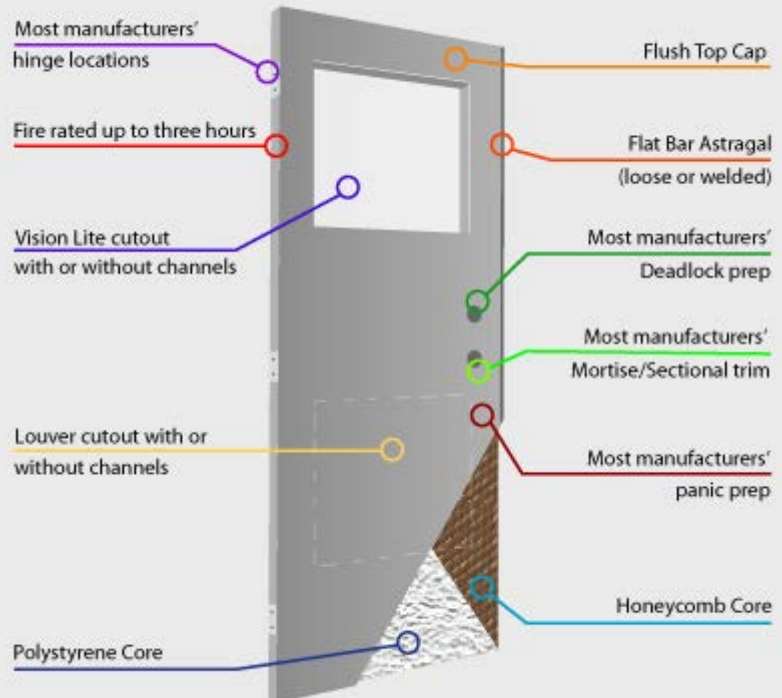

Each Door is Custom Built – Stock doors are custom built to each order. You specify: cutouts for louvers and lites; precision function holes; doors up to eight feet tall; choice of honeycomb or polystyrene core; fire rating up to three hours, and other features.

Same Day Availability – Order by 9 a.m. on any business day, and by 4 p.m. your stock doors are ready for Will Call or LTL shipment. Door Components' offers its own next business day delivery service to five Southern California counties.

Same Quality as our Custom Doors – All doors are made of material identical to our custom products. Each stock product is precision cut and made to order. All products are galvanized on all surfaces and have a seamed edge. Every Door Components product is made of U.S. steel in our Southern California factory.

Rid Your Warehouse of Unnecessary Stock Products – Because we require no minimum order quantity and because we have one-day turnaround on any stock order, clients can use Door Components as their stocking warehouse.

DOORS

Some options at additional charge
Some trim options only available on custom door
