DOOR COMPONENTS IS ON FIRE!

We're announcing five new products in five days

DAY 5

We've saved the best for last in Door Components' "Five Products in Five Days" announcement blitz.

Door Components stainless steel doors and frames are, to many of our customers, a well-kept secret. So, for those of you who don't know that we have been making stainless steel doors and frames for years – this is a new product announcement.

And for everyone else, you already know that we offer the best workmanship in the industry. In fact, some of our competitors (we can't name names) order and resell our stainless steel doors and frames!

We custom manufacture every door to your exact specifications in our factory. And, because each door and frame is made by Door Components employees at our manufacturing facility in Southern California, we can guarantee quick delivery and top quality. Every Door Components product is 100% American made.

We'd like to invite you to visit our new 94,000 square foot facility in Southern California to check out our state-of-the-art manufacturing operation for yourself.

For more information about our wide variety of stainless steel doors and frames, or any other Door Components products, contact your Door Components representative.
